

MESA VERDE NATIONAL PARK

VISITOR DISTRIBUTION &
TRANSPORTATION STUDY/EIS

Information on Today's Open House

May 25, 2004

Thank you for attending our open house. Today we are presenting:

- A summary of the **Desired Conditions** we have collectively developed for Mesa Verde National Park.
- **Preliminary Alternatives**, which have been developed from our knowledge of transportation issues, anticipated needs, project goals, and desired conditions.

We request **Your Input** on the preliminary alternatives before they are refined and carried forward into **Detailed Environmental Evaluation**.

Please keep in mind that the alternatives presented today have already undergone one level of screening to ensure they address the study's purpose and need. The next, detailed evaluation/second screening process will help us determine the best alternative to implement in Mesa Verde's future.

Please review all our materials – including the “How to View and Interpret the Preliminary Alternatives” information and “Assumptions Common to All” – and give us your thoughts. Please tell us: 1) if we have represented all concepts; and 2) if you have any new ideas.

Your input is critical.

– With sincere thanks from the project team
